

Ricardo Calçado

Platforms & Developer Experience Engineer

Lisbon, Portugal • ricardo.calcado10@gmail.com • github.com/paparuco • linkedin.com/in/ricardocalcado

SUMMARY

In a world full of toil, there is a need to automate it — that is one of the things I love. I build automations and code that generate time for developers and myself to do what we like. Whether it's creating modules in Terraform or pipelines in GitHub Actions to accelerate these procedures, that's what I find fun about work — especially when people say they don't lose time anymore on boring procedures.

EXPERIENCE

Platforms Engineer · NOS Inovação May 2022 — Present

Lisbon, Portugal · Hybrid

- Leveraged Terraform to build an Internal Developer Platform (IdP) that distributes access and self-service infrastructure, empowering developers in their work.
- Managed platforms such as SonarQube and HashiCorp Vault, using them to power up developers day-to-day.
- Created automations via GitHub Actions to reduce toil and speed up productivity.
- Adopted Backstage as a software catalog and built custom plugins for it.

Cloud Engineer · NOS Inovação Apr 2021 — May 2022

Lisbon, Portugal · Full-time

- Started my Infrastructure as Code (IaC) journey, using Terraform to manage cloud resources.

Consultant · Onile IT Apr 2021 — Present

Full-time

- Engaged as a consultant delivering platform and cloud engineering work (currently at NOS Inovação).

Software Developer · Randstad (external at Nokia) Sep 2020 — Apr 2021

Portugal

- Worked as an external developer at Nokia.
- Developed Java applications.
- Created and developed Kubernetes services using Helm.

Software Developer Trainee · Nokia Sep 2019 — Aug 2020

Lisbon Region, Portugal

- Worked on an alarm-based healing program using Java and, later, the Camunda framework to create automations that trigger responses according to received alarms.

EDUCATION

Bachelor's degree — Informatics Engineering 2014 — 2019

Faculdade de Ciências da Universidade de Lisboa (FCUL)

CERTIFICATIONS

- Google Associate Cloud Engineer (issued Sep 2021)

SKILLS

Core: Python, Java, Bash

Platform Engineering: Backstage, Internal Developer Platform, HashiCorp Vault, SonarQube

DevOps & IaC: Terraform, Terragrunt, Docker, Kubernetes, Helm, Argo CD

Cloud: Google Cloud (GCP), Microsoft Azure

CI/CD & Automation: GitHub Actions, Camunda

Observability & Data: Grafana, PostgreSQL, SQL Server

Tooling: Linux, WSL, VS Code, GitHub Copilot, Claude, AI Agents

Languages: Portuguese (native), English (professional)
